ASI recommends students use pods!

Why should you use pods?

• Pods are pre-measured for HE washers, so there is no chance of oversudsing.

• Pods combine detergent and softener, eliminating the need to store two products.

• Pods are spill-proof.

Too much detergent may:

• Cause skin irritation

• Discolor or gray your clothing

• Cause the washer to malfunction

ASI recommends using one pod per load!

When using pods, do not put them in the soap dispenser drawer. Toss them inside the tub with your dirty clothes.
